DETAILED ACTION

1. Claims 1-14 are pending.

Specification

2. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: Claims 13-14 provide for a computer readable medium; however, the specification fails to provide proper antecedent basis for the claimed medium.

Response to Arguments

3. Applicant's arguments, see remarks pages 11-15, filed 1/24/2008, with respect to the art rejections under 35 USC 103 have been fully considered and are persuasive. The rejections of claims 1-10 under 35 USC 103 have been withdrawn.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. **Claims 6-10, 12-14 are rejected under 35 U.S.C. 101** because the claims are directed towards nonstatutory subject matter. The cited claims are an example of functional descriptive material consisting of data structures and programs that impart functionality when employed as executed by a computer component. The cited claims may be interpreted as purely software. Thus, the claims are not statutory because they fail the practical application requirement of § 101 by failing to fall into a statutory class of invention.

Allowable Subject Matter

- 5. Claims 1-5, 11 are allowed.
- 6. Claims 6-10, 12-14 would be allowable if amended to overcome the rejections under 35 USC 101 and all claim objections.
